Janome Robotics Handle Bar

Disconnect

Unplug the handle bar wires from the side port.

Modify

Insert the adapter into the side port.

Be sure that all of the pins properly line up.

Reconnect

With the key side down, Insert the original handle bar wires into the adapter port. Insert any Port D wires into the available adapter port.

On the robot display menu, go to Home > Setup > Advanced

Select Tin Lizzie from the Machine Type drop-down menu.
